What we do

In the Skyfall POD, we are convinced that soft skills should coexist with product and other technical skills. Incorporating them into our toolkit when facing the daily challenges at work can help us achieve our goals. Moreover, we can extend their use and see them as *life skills* since they will surely help us face and overcome difficult situations.

Therefore, we aim to generate and socialize content related to soft skills to support the continuous improvement and growth of other Globers since we believe that a happier and more human Globber will undoubtedly do a better and more meaningful job.

“The Soft skills are the door to obtain that you want, all the time involving a positive environment and thoughts, it can complement the technical skills”

Giving the speech: Delivery methods

- **Four methods to deliver the speech.**
 - Improvised.
 - Manuscript.
 - Memorized.
 - Extemporaneous style of speaking.

Giving the speech

- Practice, practice and practice.
- Structure of the speech
- Communication anxiety. How to handle it ?

Practice: Create an speech

Create and give an speech

- It's a persuasive speech with a 50% male and 50% female audience
- You will have 5 minutes to prepare the speech
- Choose an object, the one you have at hand (i.e ring, water bottle, cel, etc)
- Make the speech:
 - Work on the body, introduction and conclusion.
 - Don't forget to capture the audience in the introduction!
 - Define the delivery method
 - Give the speech

Time to create a speech
