"The Soft skills are the door to obtain that you want, all the time involving a positive environment and thoughts, it can complement the technical skills"

What we do

In the Skyfall POD, we are convinced that soft skills should coexist with product and other technical skills. Incorporating them into our toolkit when facing the daily challenges at work can help us achieve our goals. Moreover, we can extend their use and see them as *life skills* since they will surely help us face and overcome difficult situations.

Therefore, we aim to generate and socialize content related to soft skills to support the continuous improvement and growth of other Globers since we believe that a happier and more human Globber will undoubtedly do a better and more meaningful job.

“The Soft skills are the door to obtain that you want, all the time involving a positive environment and thoughts, it can complement the technical skills”

Work on a Presentation

“Simple can be harder than complex: you have to work hard to get your thinking clean to make it simple. But it's worth it in the end because once you get there, you can move mountains.”
